Montgomery County Department of Permitting Services Electrical Plan Review

A/P # 622341 Scope: Revision (10/07/2013) Project: Hellerstein Residence- Rooftop PV Power System Address: 1909 Franwell Ave., Silver Spring, MD 20902 Date: ------10-07-2013 Reviewer:--Ronald Cole Ph: -----240-777-6288 Fax: -----240-777-6241

General Electrical Notes

Note: This Revision removed the Battery Back- Up from the PV System.

All Comments dated 01/04/2013 by Ronald Cole are incorporated and part of the review of this Revision.

See Montgomery County conditionally approved statement on plan cover sheet.

255 Rockville Pike, 2nd Floor • Rockville, Maryland 20850-4166 http://permittingservices.montgomerycountymd.gov

GENERAL STRUCTURAL APPLANGUMENT APPROVED SUBJECT TO FURTHER APPROVAL OF CONSTRUCTION

Dear Mr. Stadin:

We have completed our design check of the existing roof system to carry a new solar panel system. The existing roof system consists of 2 x 6 rafters spaced at 16" on center. In the attic are knee walls to cut down the span of the rafters. The solar panel system with tracks weighing approximately 3.09 pounds per square foot. Our design check is based on IRC 2012 code. Our design check is based on 30 pounds a square foot snow loads and 20 psf (90 MPH 3 second gust) wind loads.

The design verification has been based on the following:

- 1. Design check based on IRC 2012. ASCE7-05
- 2. American Forest & Paper Association / American Wood Council NDS design manual 2005 edition.
- 3. Wind loads of 20 psf, snow loads of 30 psf, and seismic Ss = 15.58 %, S1 = 5.03 % which qualifies for seismic design category of A.

Based on the information we were furnished it is our professional opinion that the existing roof system has the capacity to carry the new above referenced solar panel system. It should be noted that we our not responsible for any water infiltration due to the installation of the solar panel system.

I here by certify that this letter was prepared or approved by me, and I am a duly licensed professional engineer under the laws of the state of Maryland license number 8998, expiration date February 3, 2013

If there are any questions concerning this matter, please do not hesitate to contact our office.
